

TECNOLOGIA EM VEDAÇÕES

Catálogo Gaxetas AG / B / BS / STD

Novembro 2021

Gaxeta - Modelo AG1 / AG5

Medidas nominais milimétricas

Características:

São gaxetas de perfil simétrico, que podem ou não estar associadas a anéis ou cordões de seção circular e que fazem vedações de hastes ou êmbolos.

A grande vantagem desta associação está em proporcionar à gaxeta condições de suportar desde pressões negativas até altas pressões hidráulicas.

Por serem fabricadas em Poliuretano com Molibdênio, apresentam excelente resistência à abrasão, à extrusão, a impactos e baixo coeficiente de atrito. Possuem também vida útil bem superior à dos vedadores de borracha em geral.

Aplicações:

São aplicadas em movimentos alternativos de sistemas pneumáticos ou hidráulicos de baixas e médias pressões, ou seja, em prensas, máquinas operatrizes, aparelhos de levantamento, tratores, máquinas agrícolas, máquinas de construções e máquinas em geral.

Especificações:

Gaxeta: Poliuretano

Dureza: 95 Shore A

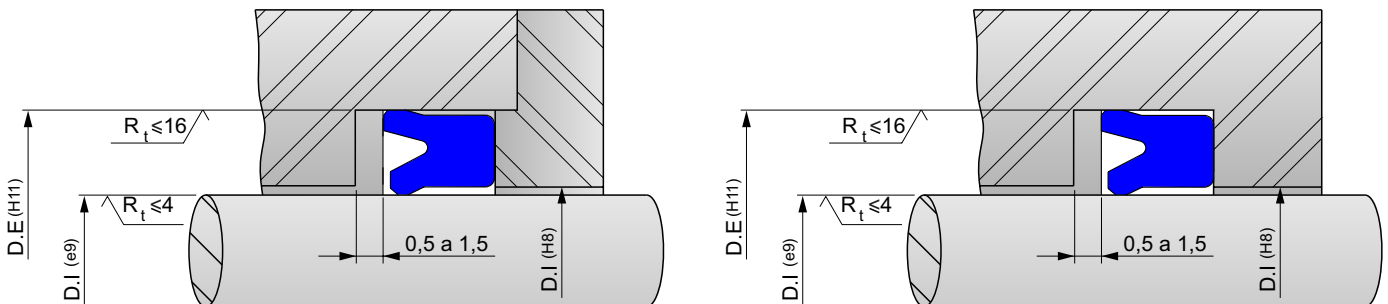

Pressão: $\leq 200 \text{ kg/cm}^2$

Velocidade: $\leq 0,5 \text{ m/s}$

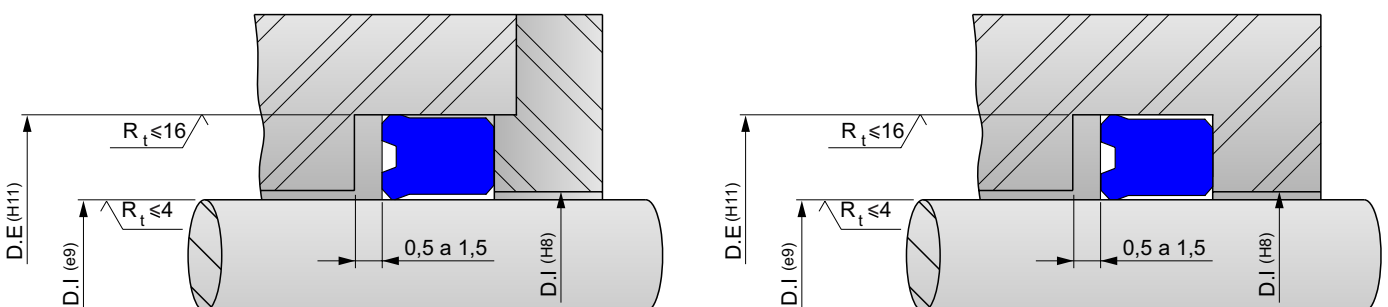

Temperatura: -45°C a $+135^\circ\text{C}$

Tolerâncias:
